

PROFILE

Hello, I'm Bumku Choi, and I always make sure to complete the tasks assigned to me.

I am currently studying graph-based recommendation systems using Python and striving to harness the power of graphs for various purposes.

I enjoy working on projects with a team, as I find great satisfaction in collaborating with team members, communicating, and planning together. I have experience combining my own technical knowledge with that of my teammates.

HOBBIES

Swimming
Watching science/engineering videos
Coding

BUMKU CHOI

Student Developer

EDUCATION

DongA University

2019.03 - now
GPA: 3.87/4.5

I am learning about recommendation systems using graphs and Graph Neural Networks (GNN) in the Data Science Lab.

I am collaborating with talented student developers at Google Developer Student Clubs (GDSC), engaging in various studies and projects while fostering communication.

PROJECT

CONREC [Implementation Developer]

2023.06 - 2023.09

This is a system that recommends continuously evolving videos based on the user's comprehension of concepts.

I collaborated with my team to plan the project, and I primarily took on the role of system development.

Web-Media-Mix [Data Structure Developer]

2022.03 - 2022.07

I contributed to an open-source project on GitHub by providing direction and creating data structures.

Shall we grab a bite to eat? [AI Developer]

2023.06 - 2023.08

Using the GPT API, I implemented a simple food recipe recommendation for children of double-income couples when their parents are away.

SKILLS
